Much has been said about designing the proper smile arc and occlusion for restorative treatment. However, one of the most influential, often overlooked - factors in anterior esthetics and incisor display is the underlying skeletal pattern. The skeletal pattern plays an integral role in all aspects of the smile including incisal display, smile arc and contour, anterior cants, and anterior occlusion. This lecture will explore how skeletal patterns influence occlusions development and the challenges that may be associated with them.

*30-minute break with exhibitors from 3-3:30 PM

FINGERPRINTING

NWDDA will **NOT** provide fingerprinting/background screening appointments during the 2026 Annual Meeting. NWDDA encourages all licensed dentists (and hygienists) to satisfy this requirement well in advance of the deadline: February 28, 2026. Please note that this is not something you can do at the last minute. The Florida Dental Association suggests completing the process at least 14 days before the end of the biennium.

Waiting too long will result in the expiration of your license. Plan ahead and complete all screening requirements well before your expiration date. The renewal period opens 90 days in advance, so use this time to start the screening process and avoid disruptions to your license status. Information can be found at floridadental.org/fingerprinting.

This course combines two important topics into one epic learning experience. The session starts with a masterclass in online branding and social media marketing. In today's digital age, a strong online presence is essential for dental offices and small business looking to thrive in a competitive marketplace. This session will equip you with the knowledge and skills to build a compelling brand identity, connect with your target audience, and maximize your impact across multiple social media platforms.

The second part of the session focuses on strategies to plan and organize your work life as a dental team member. It's easy for doctors to get tunnel vision throughout the day - like they're wearing loupes 24/7. As a team member, it's your job to clear that tunnel so you can deliver smooth and effective patient care. These skills will help you stay ahead of schedule, take control of your patient care, reduce stress and gain mental clarity. You'll also learn how to align your mindset with your dentist's to better manage the workday and create a positive office atmosphere.

Steal the Show, Not the Data: Protecting Your Practice and Patients Center Stage

With cyberattacks on the rise across dentistry, including incidents at the American Dental Association, protecting your patients and your practice has never been more critical. Cybersecurity means preventing, detecting, and responding to threats that can compromise not only data but also the trust patients place in your team. At the same time, the strength of your practice lies in teamwork. When dental professionals support one another, patient care thrives; when collaboration falters, both the practice and patients suffer. In this interactive presentation, you'll learn common-sense strategies to safeguard sensitive information while also exploring practical ways to build a culture of teamwork. Together, these skills will help create a secure, positive, patient-centered environment that benefits your entire practice.

In this high-impact session, Dr. Simone Ellis reveals the systems and leadership strategies that make high production days not just possible—but sustainable. This course is designed for practice owners and dental teams ready to move beyond survival mode and into scalable success. Attendees will learn how to create workflows that increase efficiency, energize their team, and deliver exceptional care — all while preserving their well-being. Whether your goal is \$5,000 or \$20,000 a day, this course offers the roadmap to get there without losing your mind — or your mission.

TEAM TRACK

Every successful dental practice runs on the strength of its team, and that means you: the hygienists, assistants, and administrative professionals who keep everything moving. But when schedules are jammed, patients need extra care, and the to-do list never ends, even the best teams can hit a breaking point. Stress turns into burnout, and the joy of your work begins to fade.

This course is designed to change that. Built specifically for dental team members, it offers practical, proven systems to make each day feel more manageable, less draining, and more rewarding. You'll discover simple strategies to reduce stress, protect your energy, and restore the motivation that first brought you into dentistry.

CE Credits: 2

DENTIST TRACK

STATE-MANDATED
COURSES

Oral-facial pain is common, and opioids have traditionally been used for relief — but they carry risks of dependence, addiction, overdose, and even death. Dental professionals must be trained to balance benefits and risks, optimize patient care, and protect both public health and practice outcomes. This course provides the required information about Florida's CS/CS/HB 21, including current standards for prescribing controlled substances (particularly opiates), as well as alternatives, nonpharmacological therapies, prescribing emergency opioid antagonists, and understanding addiction risks during acute pain management. This lecture satisfies the Florida Board of Dentistry's continuing education requirement for Safe and Effective Prescribing of Controlled Substances. These two hours of CE also apply toward the eight-hour MATE Act requirement.
